mybike

mybike.belgium.be is a bicycle registration platform supported by the federal state and the three regions.

On the platform you can **register** and **identify** your bike by means of a sticker in order to reduce the risk of theft and fencing and to increase your chances of recovering it in case of theft.

Register your bike on the platform.

First create a profile, then register your bike and add your personal details as well as the particularities of your bike (pictures, proof of purchase, serial number ...).

Good to know

The sticker is **tear, UV and weather proof**, and won't damage the frame.

Combined with a proper padlock it will reduce the risk of theft.

If your bike gets stolen, do not forget to report the theft to the police at **police-on-web.be** and at **mybike.belgium.be**.

Identify your bike by means of the sticker.

Affix it to the frame of your bike or at a clearly visible place.

The sticker consists of a unique identifier and a QR code.

This way, any buyer, police officer, etcetera can check whether the bike has been reported stolen, either by scanning the QR code or by entering the identifier on the platform.
