

Cyclist invisible

BRUSSELS MOBILITY

BRUSSELS REGIONAL PUBLIC SERVICE

Visibility while cycling

Your bike needs the following:

- Bike lights (white or yellow in the front, red at the rear) that are visible at a 100-metre distance. They may be flashing lights or you can place them on your rucksack, clothes, and so on.
- Bike reflectors (white in the front, red at the rear, yellow or orange on the pedals)
+ yellow or orange reflectors on the spokes and/or white reflective strips on the wheels.

In order to be seen, equip yourself!
